Tehran · open to relocation (EU, UK, Canada, Gulf)

I sit with a team, find the slow part of its week, and ship the product that removes it: brief, design, code, deployment and handover. I build with AI coding tools in the loop and own every line that ships.

EXPERIENCE

Ronix Tools · AI Specialist → de facto product owner, internal software

OCT 2024 – NOW

Branding department of a power- and hand-tool manufacturer selling in 80+ markets

- **Tool Hub**: sole builder of the branding team's production platform. Eight tools that replaced hand-made Illustrator work (Persian and English dealer cards, carton labels, QR codes, a one-page catalog designer, a versioned landing-page editor, an infographic designer and translator), CMYK print output, roles and per-person access, run history, and single sign-on for the company's other apps. Next.js, TypeScript, SQLite; 49 pull requests merged in six weeks; a push goes live in ~2 minutes.
- **Brand asset manager (DAM)**, built with Sam Mehrany: owned the product, information architecture and partner-portal redesign. Five roles on one library; distributors download a product's approved files by typing its code. Ran a pre-release audit with 30 findings, 3 of them critical.
- **Archive restructure**: wrote a read-only crawler that inventoried 4.23M files / 193.4 TB across 36 servers, found 55.7 TB of duplicates, and re-planned the archive from 15 folder levels to 4, with an executive deck and a migration runbook.
- **Content OS**: content-quality dashboard for a multilingual, multi-brand catalog, with a readiness score and gap work-lists (Flask, React). **PDMS**: Persian packaging-design order and approval workflow (Express, React, MySQL); first version in two days.
- **Jira analytics**, built with Sam Mehrany: reconstructed product pipelines from 29k issues and found that 37% of a median 70-day pipeline was dead time; manager-facing assistant on a local LLM.

Ronix Tools · English Writer

JUL 2023 – OCT 2024

- Product and marketing copy for the international brand; custom GPTs for SEO opportunity research and article briefs; AI-assisted translation of InDesign catalogs with tool-specific glossaries.

Nassir Institute · English Language Teacher

JUN 2021 – JUL 2023

- Part-time, alongside my degree: academic, professional and immigration-track learners.

SHIPPED WITH

Web · Next.js, React, TypeScript, Tailwind

Back end · Node/Express, Python/Flask, SQLite, MySQL, Postgres (Supabase)

Ops · Linux, nginx, systemd, cron-based deploys, Git/GitHub

AI · Claude, ChatGPT, Gemini, Ollama (local LLMs), Stable Diffusion, ComfyUI

Design · design systems, Figma, Illustrator, Photoshop

EDUCATION

BA, English Translation · Imam Khomeini International University, Qazvin · 2024

LANGUAGES

Persian, native · English, professional · French, beginner

SIDE PROJECT

setayeshahmadi.com: portfolio site and deck for a graphic designer.
